~~84.99 \$US~~

### What you'll learn

- ✓ You will master the Python programming language by building 100 unique projects over 100 days.
- ✓ Be able to use Python for data science and machine learning.
- ✓ You will learn automation, game, app and web development, data science and machine learning all using Python.
- ✓ Be able to build fully fledged websites and web apps with Python.
- ✓ You will be able to program in Python professionally.
- ✓ Create a portfolio of 100 Python projects to apply for developer jobs.
- ✓ Build GUIs and Desktop applications with Python.
- ✓ You will learn Selenium, Beautiful Soup, Request, Flask, Pandas, NumPy, Scikit Learn, Plotly, and Matplotlib.
- ✓ Build games like Blackjack, Pong and Snake using Python.

## Course content

19 sections • 676 lectures • 64h 2m total length

- Chapter 1: Beginner - Working with Variables in Python to Manage Data
- Chapter 2: Beginner - Understanding Data Types and How to Manipulate Strings
- Chapter 3: Beginner - Control Flow and Logical Operators
- Chapter 4: Beginner - Randomisation and Python Lists
- Chapter 5: Beginner - Python Loops
- Chapter 6: Beginner - Python Functions & Karel
- Chapter 7: Beginner - Hangman
- Chapter 8: Beginner - Function Parameters & Caesar Cipher
- Chapter 9: Beginner - Dictionaries, Nesting and the Secret Auction
- Chapter 10: Beginner - Function with Outputs
- Chapter 11: Beginner - The Blackjack Capstone Project
- Chapter 12: Beginner - Scope & Number Guessing Game
- Chapter 13: Beginner - Debugging: How to Find and Fix Errors in your Code
- Chapter 14: Beginner - Higher Lower Game Project
- Chapter 15: Intermediate - Local Development Environment Setup & the Coffee Machine
- Chapter 16: Intermediate - Object Oriented Programming (OOP)
- Chapter 17: Intermediate - The Quiz Project & the Benefits of OOP
- Chapter 18: Intermediate - Turtle & the Graphical User Interface (GUI)
- Chapter 19: Intermediate - Instances, State and Higher Order Functions

## Requirements

No programming experience needed - I'll teach you everything you need to know

A Mac or PC computer with access to the internet

No paid software required - I'll teach you how to use PyCharm, Jupyter Notebooks and Google Colab

I'll walk you through, step-by-step how to get all the software installed and set up

## Who this course is for

If you want to learn to code from scratch through building fun and useful projects, then take this course.

If you want to start your own startup by building your own websites and web apps.

If you are a complete beginner then this course will be everything you need to become a Python professional

If you are a seasoned programmer wanting to switch to Python then this is the quickest way. Learn through coding projects.

If you are an intermediate Python programmer then you know 100 days of code challenges will help you level up.

Everything about

Courses Details

### This courses includes

-  60 hours on-demand video
-  230 article
-  128 downloadable resource
-  1 coding exercises
-  Full lifetime access
-  Mobile and TV access
-  End of training certificate
